

RUNACLUB *Administrative Solutions*

RunAClub - Terms & Conditions - Draft, a work in progress

1. The system is supported by a commercial ISP. That ISP has terms and conditions which govern how their services are used and what information is stored. Their terms and conditions therefore must form part of these terms and conditions.
2. The fee to use the system is calculated based on the number of registered users who use the system in each year. The fee is a standard fee which is increased annually in line with the published CPI index. The fee is payable in advance for each year based on the number of members at the end of the previous financial/membership year. At the end of the year an adjustment will be made for the actual number of registered users in the year.
3. If the organisation has members other than standard members such as student or corporate members, the usage fee will be adjusted in the same ratio as the organisations standard fee to the non standard fee.
4. Any using organisation who is 30 days or more in arrears in paying the annual usage fee will have their system put into read only mode until the fee is paid. Those over 90 days in arrears will be bared access.
5. The user acknowledges that the system continues to be a work in progress. Users have the ability to make suggestions and requests for changes to the system so that it better fits their needs. The system is also undergoing continuous improvement and polishing. As a result, unfortunately, from time to time problems may become evident. The user agrees to bring any problems they detect to the attention of those responsible for maintaining the system, assist in diagnosing the cause, and assist in rectifying any issues resulting from the problem.
6. Any suggestions from users which become features of the system become part of the system and any IP related to the idea remains with the system.
7. As all organisations are ultimately responsible for their own welfare, facilities are provided to allow each user to back up both their database information and non database information. Non database information includes images, documents etc. It is expected that each user will appoint a web site administrator who will have the responsibility to back up the users data over the internet and to arrange the safe storage of those back ups.
8. The standard fee per user is based on an average storage space of 0.25 mb per user. The database storage use is very economical so the additional storage is for images etc. If the total storage for a user organisation is in excess of that allowed for the number of registered users, the additional storage will be charged for at commercial rates.
